

Table of Contents

Preface

Acknowledgements

Chapter 1: Economics: A way of thinking about the world

Part 1: Microeconomics

Chapter 2: Buyers, Sellers, and Markets

Chapter 3: Beyond Demand and Supply: Behavioural Analyses of Markets

Chapter 4: Elasticity of demand and applications

Chapter 5: The pricing decision for a firm

Chapter 6: Monopoly and market power

Chapter 7: Competition and the limits of market power

Chapter 8: Thinking Strategically

Chapter 9: Tackling climate change

Part 2: Macroeconomics

Chapter 10: Measuring a country's income and the cost of living

Chapter 11: Who saves, who borrows and why?

Chapter 12: The benefits of international trade (and its discontent)

Chapter 13: Currencies and exchange rates

Chapter 14: Living in a globalized world

Chapter 15: Economic upheavals and government policy

Part 3: Answers

Chapter 16: Answers to end of chapter discussion questions

Detailed Table of Contents

Preface

Acknowledgements

Chapter 1: Economics: A different way of thinking about the world

- 1.1 Introduction
- 1.2 The world through the eyes of an economist
- 1.3 The economics of sex
- 1.4 Correlation versus causation
- 1.5 Base-rates
- 1.6 Using models to study economics
- 1.7 Concluding remarks

Food for thought 1.1 Covid-19 and Identified versus Statistical Lives

Food for thought 1.2 How differential birth rates are changing our world

Part 1: Microeconomics

Chapter 2: Buyers, Sellers, and Markets

- 2.1 Introduction
- 2.2 Where does demand come from?
- 2.3 Factors that affect demand such as substitutes and complements
- 2.4 Supply
- 2.5 Factors that affect supply
- 2.6 Arriving at the market “equilibrium”
- 2.7 Consumer and Producer Surplus
- 2.8 Concluding remarks

Food for thought 2.1 Petrol prices during the Covid-19 pandemic

Food for thought 2.2 The market for salmon

Mathematical Appendix: Deriving demand and supply equations and solving for market equilibrium

Chapter 3: Beyond Demand and Supply: Behavioural Analyses of Markets

- 3.1 Introduction
- 3.2 Total and marginal utility
- 3.3 Failure to think at the margin and the sunk cost fallacy
- 3.4 Do markets really work like this in real life?

- 3.5 When markets do not work so smoothly; market power on one side of the market
- 3.6 Concluding remarks
- Food for Thought 3.1 The difference between soda vending machines and newspaper vending machines
- Food for thought 3.2 Do our brains really work like this?
- Food for thought 3.3 The futility of gift giving

Chapter 4: Elasticity of demand and applications

- 4.1 Introduction
- 4.2. The concept of elasticity
- 4.3 The relation between elasticity and a seller's revenue
- 4.4 Price elasticity of supply
- 4.5 Cross price elasticities
- 4.6 Two policy interventions in markets
 - 4.6.1 Price ceiling
 - 4.6.2 Price Floor
- 4.7 Elasticity and tax incidence
- 4.8 Concluding remarks
- Food for thought 4.1 The price of coffee at Samir's
- Food for thought 4.2 India's attempt to reduce agricultural subsidies in 2020
- Food for thought 4.3 Raising the minimum wage
- Mathematical Appendix 1: Algebraic solution to the tax incidence problem
- Mathematical Appendix 2: The midpoint formula for calculating elasticities

Chapter 5: The pricing decision for a firm

- 5.1 Introduction
- 5.2 What does market power mean?
- 5.3 The decision-making problem for a firm with market power
- 5.4 Costs of doing business
 - 5.4.1. The production relation
 - 5.4.2. Costs of production
- 5.5 Demand for Kiriana's pizza and her sales revenue
- 5.6 Kiriana's pricing decision

- 5.7 Concluding remarks
 - Food for thought 5.1 Mark-up pricing
 - Mathematical appendix: How do we get Marginal Revenue from Total Revenue

Chapter 6: Monopoly and market power

- 6.1 Introduction
- 6.2 Monopolies
- 6.3 How do monopolies come about?
- 6.4 The monopolist's decision-making problem
- 6.5 Maximize revenue or maximize profit?
- 6.6 Relaxing the assumption of one price
- 6.7 Exploiting differential willingness to pay by charging different prices
- 6.8 Regulating a franchise monopoly
- 6.9 Concluding remarks

Food for thought 6.1 Why don't businesses give away unsold goods or at least sell them very cheaply?

Food for thought 6.2 Is New Zealand a rip-off?

Food for thought 6.3 Why regulate Google or Facebook (or Big Tech in general)?

Food for thought 6.4 Is the price right? Fairness and economics

Mathematical Appendix: Solving the monopolist's pricing decision problem

Chapter 7: Competition and the limits of market power

- 7.1 Introduction
- 7.2 Oligopoly
- 7.3 Monopolistic competition
- 7.4 The limits of market power: perfectly competitive markets
- 7.5 The decision problem for firms in perfectly competitive markets
- 7.6 Should you shut down your business if you are making a loss?
- 7.7 The costs of market monopolization
- 7.8 Concluding remarks

Food for thought 7.1 Examples of price fixing in oligopoly

Food for thought 7.2 Matching your competitor's price

Food for thought 7.3 Collusion in non-competitive markets

Food for thought 7.4 Fisherman in Kerala use cell phones to find the market price for sardines

Chapter 8: Thinking Strategically

- 8.1 Introduction
- 8.2 The Prisoners' Dilemma
- 8.3 Sarah's and Stephen's choices in Golden Balls revisited
- 8.4 Prisoners' Dilemma in the animal world
- 8.5 Collusion among oligopolists is a prisoner's dilemma game
- 8.6 Getting people to cooperate in the prisoners' dilemma game
- 8.7 A game where only one player has a dominant strategy
- 8.8 The importance of being unpredictable
- 8.9 Hunt a stag or a rabbit? The stag-hunt game and payoff-ranked equilibria
- 8.10 Please, why don't you go first? Games where players move in sequence
- 8.11 Concluding remarks

Food for thought 8.1 The Princess Bride

Food for thought 8.2 A game theoretic analysis of "The Gift of the Magi" by O'Henry

Chapter 9: Tackling climate change

- 9.1 Introduction
- 9.2 Music to some, noise to others: Positive and negative externalities
- 9.3 Market interventions to address externalities
- 9.4 Other approaches to minimizing pollution
 - 9.4.1: A de-centralized approach to the problem of negative externality; the Coase Theorem
 - 9.4.2 Command-and-control approaches
- 9.5 Climate change as a global public good
- 9.6 Experimental studies of the provision of public goods on the basis of private cooperation
- 9.7 Dealing with climate change requires global effort
- 9.8 Concluding remarks

Part 2: Macroeconomics

Chapter 10: Measuring a country's income and the cost of living

- 10.1. Introduction
- 10.2 Measuring a nation's income: Gross Domestic Product (GDP)
- 10.3 Drawbacks to GDP; unequal distribution of income and wealth
- 10.4 Measuring GDP
 - 10.4.1 Nominal versus Real GDP
- 10.5 Calculating the cost of living
- 10.6 Why do we need to know about price changes?
 - 10.6.1 Real and nominal interest rates
 - 10.6.2 Comparing incomes from different times
- 10.7 Concluding remarks

Food for thought 10.1 Luck or merit: the source of inequality matters

Food for thought 10.2 Hyperinflation in Venezuela

Food for thought 10.3 Some drawbacks of the CPI as a measure of aggregate price level

Food for thought 10.4 The illusion of money

Chapter 11: Who saves, who borrows and why?

- 11.1 Introduction
- 11.2 How are interest rates determined?
- 11.3 Responses to and impact of government policies
 - 11.3.1 Lowering taxes on earnings from savings via interest income
 - 11.3.2 Investment tax credits
 - 11.3.3 Impact of government budget deficits or surpluses
- 11.4 Time and money; calculating present value of future amounts
- 11.5 Concluding remarks

Food for Thought 11.1 Digital currency bad news for consumer debt

Appendix: Financial economics

- A11.1 Financial Markets
- A11.2 Types of financial assets
- A11.3 Asset bubbles

- Chapter 12: The benefits of international trade (and its discontent)
- 12.1 Introduction
 - 12.2 The benefits of international trade and the role of absolute advantage
 - 12.3 The concept of comparative advantage
 - 12.4 Restrictions on trade; tariffs and quotas
 - 12.4.1 Tariffs
 - 12.4.2 Quotas
 - 12.5 Why is trade so controversial these days?
 - 12.6 Concluding remarks
- Food for thought 12.1 Why is it so hard to find good coffee in Colombia?
- Food for thought 12.2 Network externalities

- Chapter 13: Currencies and Exchange Rates
- 13.1 Introduction
 - 13.2 The market for currencies and the nominal exchange rate
 - 13.3 The determination of the nominal exchange rate
 - 13.4 Expectations, arbitrage, and trading in foreign exchanges
 - 13.5 Flexible versus fixed exchange rates
 - 13.6 Flexible and fixed exchange rates revisited: Gold standards and the Bretton-Woods System
 - 13.7 How much does your dollar buy? The real exchange rate
 - 13.8 Concluding remarks
- Food for thought 13.1 The East Asian Currency Crisis of 1997
- Food for Thought 13.2 The Big Mac Index

- Chapter 14: Living in a globalized world
- 14.1 Introduction
 - 14.2 The intertwined nature of trade in goods and services and financial flows
 - 14.2.1 From trade in goods and services to financial flows
 - 14.2.2 From financial flows to trade in goods and services
 - 14.3 Keeping track of trade flows and financial flows
 - 14.4 The relationship between saving, investment, trade, and financial flows
 - 14.5 The interlinkage between government policy, trade, and financial flows
 - 14.5.1 The effect of government budget deficits

	14.5.2 Incentives to stimulate domestic investment and implications for trade
14.6	Concluding remarks
Food for thought 14.1	China's one-child policy explains its high rates of domestic saving
Food for thought 14.2	Is the US trade deficit necessarily "bad"?
Chapter 15:	Economic upheavals and government policy
15.1	Introduction
15.2	Aggregate demand and aggregate supply
15.3	Aggregate demand
15.3.1	Why is the aggregate demand curve downward sloping when graphed against the price level?
15.3.2	What might make the aggregate demand curve shift to the left or right?
15.4	Aggregate supply
15.4.1	Why is the short run aggregate supply upward sloping?
15.5	What happens in a recession?
15.6	How do governments deal with recessions?
15.7	Fiscal policy
15.7.1	Direct impact on aggregate demand via increasing government spending
15.7.2	The consumption multiplier
15.7.3	Indirect impact on aggregate demand via tax cuts.
15.8	Monetary policy
15.8.1	The fractional reserve banking system
15.8.2	Official cash rate (OCR)
15.9	Conclusion
Food for thought 15.1	What does unemployment mean?
Food for thought 15.2	Preferences over Inflation and Unemployment: Evidence from Surveys of Happiness
Food for thought 15.3	The Greek Crisis following the Global Financial Crisis
Food for thought 15.4	Why cannot governments pay off debt by printing money?
Chapter 16:	Answers to end of chapter discussion questions
